Simple, fun, and nostalgic.

Awesome scenery, track view (something people asked for forever), and no Chris Sawyer in a shed with assembly.

The sequel has everything the first one does, and more.

But I grew up with RCT1, so it holds more nostalgia for me. In my opinion, the scenarios are better, but I believe there's a scenario importer for RCT2.

Imagine it, underground for years and years of your life.
You would go blind instantly by the sudden light at the end of the ride.

I went straight from 1 to 3 because at the time 2 looked like more of the same and I was still on pocket money back then.
I'll probably play this for a bit, get bored and then go back to 3.
